***Small Great Mining***

# What is Small GREAT Mining?

It's a concept coined by *Latam Investment Group*, and which refers to a business strategy focused on small-scale mining, but with the same quality and safety standards of the **Small GREAT Mining**, an unprecedented concept worldwide.

With a social orientation and a collaborative model, it distributes a great return to all involved.

# Who are we?

**LATAM INVESTMENT GROUP** is a holding of Chilean companies that participates in the extraction, processing and commercialization of small-scale mining projects with extraction of metals and non metals, either in association with small miners or with their own belongings. Our innovative financing system allows anyone to be an investor, promoting applied scientific developments, generating profitability, sustainability and development for the entire community in Latin America.

Our purpose is to achieve the dream of promoting this new Mining Philosophy, with a social perspective more profitable, innovative, that guarantees a safe extraction, with fast returns and with the same standards of Great Mining.

# Our Directory

Juan Vallés Aldunate

Chilean businessman and investor with more than 40 years of business experience. Partner of the **LIG Group** at S3M, a company that manufactures machinery for the mining area, he is currently the director of the Holding.

Ricardo Duque

Metallurgist, businessman and investor. Creator of Technology of **Latam Investment Group** of Leaching of metals Sulfides and Oxides by stirring. He is a partner of LIG in the company **CLEAN COPPER**

Samuel Mora Morgado

Surgeon, traumatologist with a spine specialist of great recognition in Chile. Related to the mining world for more than 5 years. He is the main shareholder of **LATAM INVESTMENT GROUP**.

Conor Connellan

Entrepreneur who has held senior management positions in the financial services and real estate sectors, working at a strategic level with one of the largest property developers in the Middle East. He is currently CEO of the multinational **LEGACY DMCC** based in DUBAI.

Mauricio Mora Morgado

Industrial Civil Engineer from the University of Chile, with a Master in Economics from the Kyoto University in Japan. He is a founding member and partner of **LATAM INVESTMENT GROUP**.

Hugo Díaz Hernández

Civil Engineer in Mines from the University of Chile where he has been a professor. He has directed the **CIMM** and the **Colegio de Ingenieros de Minas de Chile**. He was the Manager of JIGSAW in Latin America, and is currently an advisor to **CODELCO** and **ENAMI**.

Manuel Naranjo

Administrator with a specialization in Finance from the **University of Chile**. He has a Master's Degree in Administration of Health Institutions from **Finis Terrae University**. He is an advisor and consultant for various companies in Chile.

## Conor Connellan

# Chairman of the Executive Board

My extensive experience in the financial and real estate sectors has led me to acquire the ability to visualize large-scale and growing investment projects, which is why our partnership with **Latam Investment Group**, in the development of small-scale mining in Latin America, covers a wide range of projects that includes from independent miners to formal small-scale commercial mining entities that produce minerals and precious metals responsibly.

Investing in Small-scale Mining is often a huge risk. Great expertise and a lot of work are necessary to make it a profitable and stable business, and both the **LIG GROUP** and **LEGACY DMCC** have the conditions, experience and knowledge to generate highly productive businesses.

We are happy to be part of this new stage of small and medium-scale mining.

**Mauricio Mora Morgado**

## Founder and Principal Member of the Board of Directors

In Chile, as in the rest of Latin America, small-scale mining mobilizes a large number of people, but in economic terms it is far from the volumes of the large mining conglomerates.

In fact, if it weren't for the support provided by ENAMI, our small-scale mining would hardly exist, mainly affected by low-grade deposits and a lack of financing for extraction and investment in new technologies.

Our goal is to promote the small mining industry, not only in Chile but throughout Latin America, associating ourselves with the projects with the greatest projection, so that those miners who have never achieved it, finally achieve success.

Our dream of promoting this new mining philosophy for Chile and Latin America is already underway. With a creative and social perspective, but at the same time, more profitable and secure.

**Julio Lauriani López**

# Chief Executive Officer (CEO)

Better people for a better company

Just as mining and its precious metals have been the wealth of all America, people are the precious material that gives life and meaning to our organization.

Only to the extent that we have happy, innovative, creative, dynamic, self-leadership skilled, flexible, resilient people with strong values, will we also become a happy, innovative, creative, dynamic, flexible, resilient and value-driven organization.

# Our mission

Actively participate in the development of small-scale Mining Projects with safe and clean extraction of metals and non-metals, recognizing their potential, associating ourselves, generating profitability, sustainability and growth for our partners, investors and the entire community in America.

Our management will interconnect all actors and economies, take advantage of synergies of shared experiences, scientific advances, and resources.

Through our companies, we will support the growth of small miners, with capital, management, clean technologies and efficient commercial networks.

We will democratize the business of mining investment, opening spaces for small investors to be part of this great industry and enjoy its benefits

# Our Strategic Purpose

Promote a Mining Philosophy without borders for America, which guarantees a sustainable, safer and more profitable extraction. That provides and supports the development of small investors, small miners, its network of suppliers and the entire community.

# Corporate Pillars

**Empowerment**

Human Empowerment as a multidimensional process that involves strengthening the members of the LIG Group and their ability to make decisions.

# Corporate Pillars

Empowerment

Cost effectiveness

Guarantee and exceed profitability expectations,  
plus a quick return

# Corporate Pillars

Pillars of our Organization

# Operations in the World

## **Our Business Model**

# LIG Business Models

## BUSINESS FOCUS OF OUR ORGANIZATION

- **Business model “Small Big Mining”:** It involves all mining services such as exploration, extraction, processing and marketing, in addition to the supply of equipment and machinery, Research and Innovation in the area, and recycling of mining waste.
- **Business model “Gemas de Latinoamérica”:** Refers to activities related to the manufacture, design and transformation and marketing of precious stones and metals and fine gems.
- **Business model “LIG Technological”:** It involves all innovation and technology activities, including the development of software focused on the democratization of Investment in Mining and the creation of the LIG Digital System, which, among other projects, estimates the creation of a digital currency backed by processed gold, deposits or mining activities in development (mining projects), the creation of an e-Wallet, and the possibility of negotiating NFTs associated with the mining area.

# Small BIG Mining

# Business: Small BIG Mining 1/2

- **Mining Exploration Services:** Involves offering geological exploration and prospecting services to identify and evaluate mineral deposits, with the possibility of developing them in the processing phase individually, associated with a miner/investor or to sell exploitation rights to other companies. It includes the actions of LASE.
- **Mining Extraction Services:** Establishes the development of a mine of minerals, metals or non-metals, in extraction processes under proprietary technologies that allow safe, efficient and effective extraction to be able to process or negotiate raw according to market conditions.
- **Mining Processing Services:** Establishes that in addition to mineral extraction, the company also processes minerals to obtain final products with higher added value, such as metal refining or concentrate production.
- **Mining Marketing Services:** Refers to how the LIG Group executes activities related to the sale and distribution of minerals and raw materials extracted from the mining industry.

# Business: Small BIG Mining 2/2

- **Mining Exploration Services:** Consulting Services: Refers to how the LIG Group provides consulting services and technical advice to other mining companies in areas such as mine planning, environmental management, mining safety, among others.
- **Supply of equipment and machinery:** Establishes the scope of work of the Group that is dedicated to the sale or rental of equipment and machinery used in the mining industry, such as drills, excavators, transport trucks, among others.
- **Mining Research and Innovation:** It involves researching, developing and marketing innovative solutions for the mining industry, such as monitoring and control systems, automation equipment, among others.
- **Recycling of mining waste:** Show how the company specializes in the recycling and reuse of waste and waste generated by the mining industry, such as the recovery of valuable metals from processing waste.

# Gemas de Latinoamérica

# Business model “Gemas de Latinoamérica”

- **Gem Processing Services:** Refers to activities related to the manufacture, design and transformation of precious stones and precious metals into fine gems.
- **Gem Trading Services:** This service refers to activities related to the sale and distribution of gems and precious stones, ranging from the purchase and sale of gems to advice and valuation. This involves providing information on gemstone characteristics and values, as well as advising on the choice of gemstones for different purposes, such as jewelry or investment..

# Technological LIG

# Business model “Technological LIG”

- **Mining Investment Portal:** Software focused on the democratization of Investment in Mining based on the concept of Small Large Mining, which facilitates the processes of attracting investments through an automated model based on Blockchain that allows recording from investment intentions, segmentation of the investment, signing of the digital contract and monitoring of the investment in the same application.
- **LIG Digital System:** Establishes the creation of a digital currency backed by processed gold, deposits or mining activities in development (mining projects) that, based on Ethereum technology, establishes a digital ecosystem for negotiation and transaction, including within its Tokenization scheme the structuring of an e-Wallet, and the possibility of negotiating NFTs associated with the mining area.
